

ABSTRACT

WEB SYSTEM, WEB SERVER, TERMINAL APPARATUS, WEB PAGE DISPLAY METHOD, AND COMPUTER-READABLE RECORDING MEDIUM

First, a web server (20) specifies a user who logged in, and transmits, from among layout definition files defining layouts of constituent elements of web pages, the layout definition file that corresponds to the user, to a terminal apparatus (10). Next, in the terminal apparatus (10), the layout of a web page designated by the user is specified based on the transmitted layout definition file, and constituent elements needed in the specified layout are acquired from the web server (20). Thereafter, the terminal apparatus (10) arranges the acquired constituent elements in accordance with the specified layout, and displays the web page designated by the user on a screen.
