(54) Title: FABRIC TREATING COMPOSITIONS CONTAINING ESTERQUAT WITH PERIODATE SALTS

(57) Abstract: Dispersible aqueous textile treatment compositions, such as fabric softeners, which include biodegradable quaternary ammonium fabric softener actives, and which exhibit excellent long-term storage stability, even where the storage is at elevated temperatures over long periods of time. The compositions comprise a biodegradable, fatty ester quaternary ammonium compound derived from the reaction of an alkanol amine and a fatty acid derivative, followed by quaternization; together with a periodate salt, such as potassium periodate.
