

## CLAIMS

1. A method of processing videos, comprising:

displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, wherein the favorites menu comprises at least one favorites folder created by a current user, wherein the displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page comprises:

determining whether the current user has created a favorites folder in response to the preset triggering operation for the favorites control on the video playing page, and

displaying the favorites menu at the display position corresponding to the favorites control in response to determining that the current user has created the favorites folder; and

adding a first video being displayed on the video playing page to a target favorites folder in response to a selection operation for the target favorites folder among the at least one favorites folder, wherein the selection operation for the target favorites folder comprises: sliding from a position where the favorites control, on which a touch-and-hold operation is being performed, is located to a position where the target favorites folder is located and lifting.

2. The method according to claim 1, further comprising:

displaying a favorites creation panel on the video playing page in response to determining that the current user has not created the favorites folder; and

creating a first favorites folder based on the favorites creation panel, and adding the first video being displayed on the video playing page to the first favorites folder.

3. The method according to claim 1, wherein displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, comprises:

displaying the favorites menu at the display position corresponding to the favorites control in response to a long press operation for the favorites control on the video playing page;

correspondingly, adding a first video being displayed on the video playing page to a target favorites folder in response to a selection operation for the target favorites folder among the at least one favorites folder, comprises:

adding the first video being displayed on the video playing page to the target favorites folder in response to an operation of sliding to the target favorites folder among the at least one favorites folder based on the long press operation.

4. The method according to claim 1, wherein displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, comprises:  
displaying the favorites menu in a form of a bubble at the display position corresponding to the favorites control, in response to the preset triggering operation for the favorites control on the video playing page.
5. The method according to claim 1, wherein a favorites creation control is displayed on the favorites menu, and after displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, the method further comprises: creating a second favorites folder in response to a triggering operation for the favorites creation control, and adding the first video being displayed on the video playing page to the second favorites folder.
6. The method according to claim 2, wherein a favorites creation control is displayed on the favorites menu, and after displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, the method further comprises: creating a second favorites folder in response to a triggering operation for the favorites creation control, and adding the first video being displayed on the video playing page to the second favorites folder.
7. The method according to claim 3, wherein a favorites creation control is displayed on the favorites menu, and after displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, the method further comprises: creating a second favorites folder in response to a triggering operation for the favorites creation control, and adding the first video being displayed on the video playing page to the second favorites folder.
8. The method according to claim 4, wherein a favorites creation control is displayed on the favorites menu, and after displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, the method further comprises: creating a second favorites folder in response to a triggering operation for the favorites creation control, and adding the first video being displayed on the video playing page to the second favorites folder.
9. A non-transitory computer-readable storage medium, storing instructions, wherein the instructions, when executed by a terminal device, cause the terminal device to implement operations comprising:  
displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, wherein the favorites menu comprises at least one favorites folder created by a current user, wherein the displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page comprises:

determining whether the current user has created a favorites folder in response to the preset triggering operation for the favorites control on the video playing page, and  
displaying the favorites menu at the display position corresponding to the favorites control in response to determining that the current user has created the favorites folder; and  
adding a first video being displayed on the video playing page to a target favorites folder in response to a selection operation for the target favorites folder among the at least one favorites folder, wherein the selection operation for the target favorites folder comprises: sliding from a position where the favorites control, on which a touch-and-hold operation is being performed, is located to a position where the target favorites folder is located and lifting.

10. The non-transitory computer-readable storage medium according to claim 9, the operations further comprising:

displaying a favorites creation panel on the video playing page in response to determining that the current user has not created the favorites folder; and  
creating a first favorites folder based on the favorites creation panel, and adding the first video being displayed on the video playing page to the first favorites folder.

11. The non-transitory computer-readable storage medium according to claim 9, the operations further comprising:

displaying the favorites menu at the display position corresponding to the favorites control in response to a long press operation for the favorites control on the video playing page; and  
adding the first video being displayed on the video playing page to the target favorites folder in response to an operation of sliding to the target favorites folder among the at least one favorites folder based on the long press operation.

12. The non-transitory computer-readable storage medium according to claim 9, the operations further comprising:

displaying the favorites menu in a form of a bubble at the display position corresponding to the favorites control in response to the preset triggering operation for the favorites control on the video playing page.

13. The non-transitory computer-readable storage medium according to claim 9, the operations further comprising:

creating a second favorites folder in response to a triggering operation for the favorites creation control; and  
adding the first video being displayed on the video playing page to the second favorites folder.

14. A device of processing videos, comprising a memory, a processor, and a computer program stored on the memory and executable by the processor, wherein the computer program, when executed by the processor, causes the processor to implement operations comprising:

displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page, wherein the favorites menu comprises at least one favorites folder created by a current user, wherein the displaying a favorites menu at a display position corresponding to a favorites control in response to a preset triggering operation for the favorites control on a video playing page comprises:

determining whether the current user has created a favorites folder in response to the preset triggering operation for the favorites control on the video playing page, and

displaying the favorites menu at the display position corresponding to the favorites control in response to determining that the current user has created the favorites folder; and

adding a first video being displayed on the video playing page to a target favorites folder in response to a selection operation for the target favorites folder among the at least one favorites folder, wherein the selection operation for the target favorites folder comprises: sliding from a position where the favorites control, on which a touch-and-hold operation is being performed, is located to a position where the target favorites folder is located and lifting.

15. The device according to claim 14, the operations further comprising:

displaying a favorites creation panel on the video playing page in response to determining that the current user has not created the favorites folder; and

creating a first favorites folder based on the favorites creation panel, and adding the first video being displayed on the video playing page to the first favorites folder.

16. The device according to claim 14, the operations further comprising:

displaying the favorites menu at the display position corresponding to the favorites control in response to a long press operation for the favorites control on the video playing page; and

adding the first video being displayed on the video playing page to the target favorites folder in response to an operation of sliding to the target favorites folder among the at least one favorites folder based on the long press operation.

17. The device according to claim 14, the operations further comprising:

displaying the favorites menu in a form of a bubble at the display position corresponding to the favorites control in response to the preset triggering operation for the favorites control on the video playing page.

18. The device according to claim 14, the operations further comprising:

creating a second favorites folder in response to a triggering operation for the favorites creation control; and

adding the first video being displayed on the video playing page to the second favorites folder.
