(54) Title: METHODS AND COMPOSITIONS FOR DELIVERY OF CATECHOLIC BUTANES FOR TREATMENT OF TUMORS

(57) Abstract: The present invention provides kits, methods and compositions for the treatment of tumor and other proliferative diseases such as tumors. The compositions herein contain a substantially pure preparation of at least one catecholic butane, including, for example, NDGA compounds in a pharmaceutically acceptable carrier or excipient. The catecholic butane such as NDGA or its derivatives are administered to one or more subjects in need of treatment by a route other than direct injection into the affected tissues or topical application on affected tissues. Figure (1) shows systemic distribution of M4N to various organs at 3 hours following intravenous and intraperitoneal injection.
