GREENHOUSE GAS EMISSIONS MANAGEMENT METHOD

[Abstract]

[Problem to be solved] The purpose of this invention is to provide a method for efficiently managing greenhouse gas emissions, including the calculation of greenhouse gas emissions by business operators. [Solution] One embodiment of the invention is a method for managing greenhouse gas emissions, wherein information regarding energy usage is determined based on input information by a business terminal, greenhouse gas emissions are calculated based on the information regarding usage, information regarding credits to offset the obtained greenhouse gas and record the information about the credits in a blockchain.
