

PACKAGING METHOD FOR STORAGE AND MICROWAVE HEATING OF FOOD PRODUCTS

Abstract

The packaging system includes a first food product sealed within an inner wrapper, a second food product positioned within a tray and spacing the first food product from the tray, and an outer wrapper sealing the first food product, sealed within the inner wrapper, the second food product and the tray therein. A shield is disposed on the tray and is in contact with more than one surface of the second food product. Prior to microwave heating, the inner and outer wrapper are removed.
