WO 2011/137362 A1

(54) **Title**: ANTIBODIES HAVING REDUCED IMMUNOGENICITY IN A HUMAN

(57) **Abstract**: The disclosure relates to engineered antibodies that when administered to a human, exhibit a low level of immunogenicity in the human. The disclosure also relates to methods for generating the antibodies. The engineered antibodies can be derived from, *e.g.*, non-human (*e.g.*, murine) donor antibodies or from chimeric or humanized antibodies that, when chronically administered to a human, are known to, are predicted to, or are expected to, elicit a neutralizing anti-antibody response in the human.
