

INFORMATION PROCESSING APPARATUS AND INFORMATION PROCESSING
METHOD

ABSTRACT

5

The present disclosure relates to an information
processing apparatus and an information processing method that
enable easy reproduction of audio data of a predetermined kind,
of audio data of a plurality of kinds. A file generation device
10 generates an audio file in which audio streams of a plurality
of groups is divided into tracks for each one or more of the
groups and arranged, and information related to the plurality
of groups is arranged. The present disclosure can be applied
to an information processing system configured from the file
15 generation device that generates a file, a web server that
records the file generated by the file generation device, and
a moving image reproduction terminal that reproduces the file,
for example.
