(54) Title: METHODS AND SYSTEMS FOR DYNAMICALLY MANAGING REQUESTS FOR COMPUTING CAPACITY

FIGURE 1

(57) Abstract: Embodiments of systems and methods are described for dynamically managing requests for computing capacity from a provider of computing resources. Illustratively, the computing resources may include program execution capabilities, data storage or management capabilities, network bandwidth, etc. The systems or methods automatically allocate computing resources for execution of one or more programs associated with the user. The systems and methods may enable the user to make changes to the allocated resources after execution of the one or more programs has started.
