

ABSTRACT

CELL CULTURE FOR TREATING DISEASE IN THE LOWER LIMBS

An object of the present invention is to provide a cell
5 culture for treating peripheral arterial disease, a method for
producing the cell culture, a method for treating peripheral
arterial disease using the cell culture, and the like. According
to the present specification, a cell culture with a size of 100 to
500 μm having an extracellular matrix on an outer surface of the
10 cell culture, and the like are provided, and the above problem has
been solved.
