(54) Title: PRE-FILLED CONTAINER

(57) Abstract

A pre-filled plastic syringe (1) which includes: a) a barrel (1a); b) a moveable stopper (3) which seals the barrel at one end; c) a needle fitting (13) which is integral with the barrel and which is located at the end of the syringe remote from the moveable stopper; and d) a closure (9) which seals the syringe at its needle fitting end; wherein an injectable liquid (10) is housed within the barrel between the moveable stopper and the closure and wherein the closure is located within the needle fitting and/or the barrel of the syringe.
