

ABSTRACT

METHOD AND APPARATUS FOR GENERATING INI FILE, COMPUTER DEVICE, AND MEDIUM

A method and apparatus for generating an ini file, a computer device, and a medium. The method for generating an ini file comprises: determining ini file configuration parameter information of a currently flashed ini file and a timestamp of a configuration ini file; determining ini file authentication information corresponding to the currently flashed ini file according to the ini file configuration parameter information and the timestamp of the configuration ini file, and generating a target ini file containing the ini file authentication information, so that security of the ini file is improved, and configuration information security is protected.
