(54) Title: AIR FILTER HOUSING WITH SEALING MEANS

(57) Abstract: The present invention relates to an air filter housing (1) having at least one filter chamber (2, 3) for receiving at least one filter unit (F), an access opening (4, 5) in a side wall of said housing leading to said filter chamber, a door (6, 7) for closing said access opening and a clamping device (10, 11) for holding said at least one filter unit in abutment against a first end wall of said filter chamber. According to the invention a portion (16) of said clamping device is, when a filter unit (F) is held by said clamping device (10, 11), sealingly in abutment with a circumferential portion (15) of the wall of said housing (1) in the second end of said filter chamber (2, 3) so that air or decontamination gas that has passed through the filter unit (F) can not enter the filter chamber outside of the filter unit.
