

ABSTRACT

AURISTATIN DRUG WITH HIGH-STABILITY HYDROPHILIC LINKING UNIT AND CONJUGATE THEREOF

The application relates to the field of pharmaceutical technology and specifically relates to auristatin-based drugs and conjugates thereof having a highly stable hydrophilic linker unit. In particular, the application relates to a ligand-drug conjugate or pharmaceutically acceptable salts or solvates thereof, and method of preparation and use thereof. Furthermore, the application relates to linker-payloads or isomers, mesomers, racemates, enantiomers or mixtures thereof, or pharmaceutically acceptable salts or solvates thereof, and method of preparation and use thereof.
