The present disclosure aims to provide a refrigerator in which the cooling performance of a cooler is improved though a storage compartment being configured to have a temperature range higher than the temperature range of a freezer compartment is provided above the freezer compartment.

Solution to Problem

[0008]

A refrigerator according to an embodiment of the present disclosure includes a body having a refrigerator compartment, a freezer compartment provided below the refrigerator compartment, and a storage compartment provided between the refrigerator compartment and the freezer compartment, the storage compartment being configured to have a temperature range set higher than a temperature range of the freezer compartment, and having a rear storage-compartment wall at a rear of the storage compartment, and a cooler disposed behind the storage compartment in an air passage between the rear storage-compartment wall and a rear body wall at a rear of the body and configured to cool air inside the body, and a compressor disposed below the cooler. The body has a refrigerator-compartment return port through which air in the refrigerator compartment returns to the cooler, a storage-compartment return port through which air in the storage compartment returns to the cooler, and a freezer-compartment return port through which air in the freezer compartment returns to the cooler along an air passage provided in the rear storage-compartment wall. The refrigerator-compartment return port and the storage-compartment return port are provided below a lower end of the cooler. The freezer-compartment return port is provided at a part within a range between the lower end of the cooler and an upper end of the cooler.

Advantageous Effects of Invention

[0009]

According to the embodiment of the present disclosure, the refrigerator-compartment return port and the storage-compartment return port are provided below the lower end of the cooler, and the freezer-compartment return port communicating with the air passage in the rear storage-compartment wall is provided above the lower
