(54) Title: TREATMENT OF HEALING DYSREGULATION IN GI TISSUE

(57) Abstract: The present disclosure relates to the treatment of dysregulation of gastrointestinal (also referred to herein as GI) tract regeneration and/or maturation, in particular in an infant, such as a preterm (also referred to herein as a neonate), a low weight for gestational age baby and/or a baby born following pre-eclampsia by administering a therapeutically effective amount of IGF-1 in particular as a complex with an IGFBP, such as IGFBP-3. The treatment is also useful in other patient populations including the adult population for those with conditions/illness/disease and/or infection of the GI tract.
