(54) Title: MEAT ANALOGUES AND METHODS OF PRODUCING THE SAME

(57) Abstract: The present disclosure provides a meat analogue that comprises a protein-based component and a fat-based component separately distributed within the meat analogue; wherein the meat analogue comprises at least one segment that consists essentially of the protein based component which is chemically distinct from at least one other segment that consists essentially of the fat-based component; and wherein at least one of the following is fulfilled (i) a cubic sample of the meat analogue exhibits an anisotropic physical property and (ii) the meat analogue comprises a non-homogenous distribution of the protein based component and the fat-based component. Also disclosed herein is a method of producing the meat analogue, the method preferably involved digital printing of the meat analogue.
