(54) Title: FULLY VENTED WIDE RIM NURSING BOTTLE

(57) Abstract: A nursing bottle (1) is formed of a large volume container, incorporating a vent tube (3) that extends inwardly of the container, having a vent port (4) arranged approximately at the volumetric midpoint (12), so as to allow for venting of pressure, whether of excessive or vacuum, to the atmosphere, at all times. The bottle may formed of a spherical shape (1), hemispherical shape (40), cylindrical shape (18), or to other configurations that provide for the internal volumetric capacity.
