(54) Title: MULTIFUNCTION PERIPHERAL DEVICE WITH DYNAMIC USER INTERFACE DESCRIPTION

(57) Abstract: In a system for dynamically and remotely providing user interface (UI) display and processing information to a touch panel embedded within a multifunction peripheral (MFP) such as a digital copier having an internal computer for controlling the touch panel, a method that comprises linking the internal computer to an external data communication network having an external remote computer on the network; and upon the inputting of desired selections by a user at the UI and communicating the same over the network to the external computer, providing information from the external computer via the network back to the internal computer that enables dynamically changing or updating the UI display and behavior during run time of the MFP.
