ABSTRACT OF THE DISCLOSURE

A flyback transformer which has a low-voltage coil bobbin wound with a primary coil, a high-voltage coil bobbin wound with a secondary coil, high-voltage diodes and a ringing damping circuit. The high-voltage coil bobbin has DC terminals and AC terminals. First additional terminals are provided next to the AC terminals, and second additional terminals are provided next to the DC terminals. The ringing damping circuit is connected and fixed between the first additional terminals and the second additional terminals in parallel to the high-voltage diodes which are connected and fixed between the DC terminals and the AC terminals.
