(54) Title: IMPROVED DISPLAY SYSTEM

(57) Abstract

A improved display system (10, 100, 200) which is able to display both static and moving graphics on a reduced number of pixels (40). The display system (10, 100, 200) relies upon the beta apparent movement effect to "fill in" blank spaces between active pixels (40) to give the appearance of supporting an image which does not in fact exist. The display system (10, 100, 200) can display moving graphics at high resolution and static graphics at low resolution.
