CORRECTION FLUID FOR WATER-FAST INKS

A B S T R A C T

Correction fluids are provided which include an opacifying pigment, a water-fast ink
5 fixing agent including a cationic non-film-forming polymer, a binder including a film-forming polymer compatible with the ink fixing agent, and water. The new correction fluids have improved "bleed" resistance when used to
10 correct water-fast inks, such as ball-point pen inks.
