

1/7

Figure 1 showing the expression of human carboxylesterases in different cell lines.

2/7

Figure 2 showing the relative expression of hCE-1 in different cell lines.

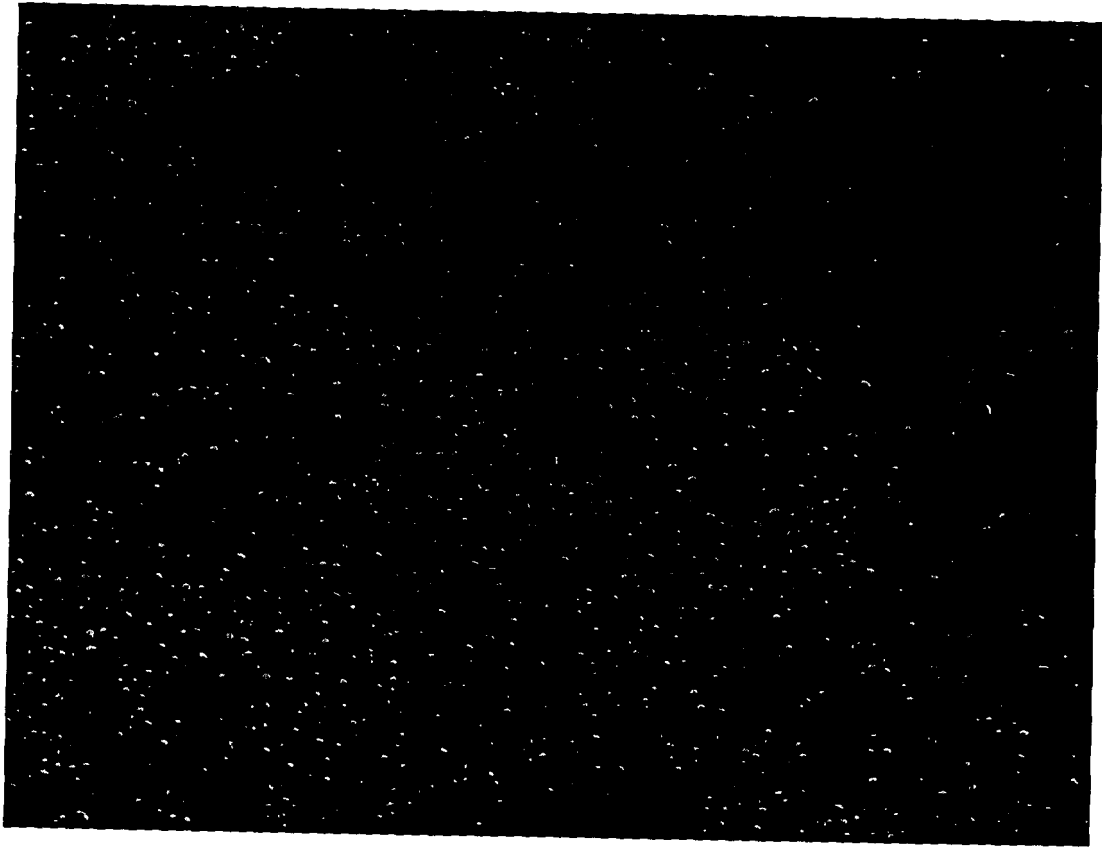

3/7

Figure 3 showing the HL60 cells stained with Example 1, 30 minutes after dye wash off

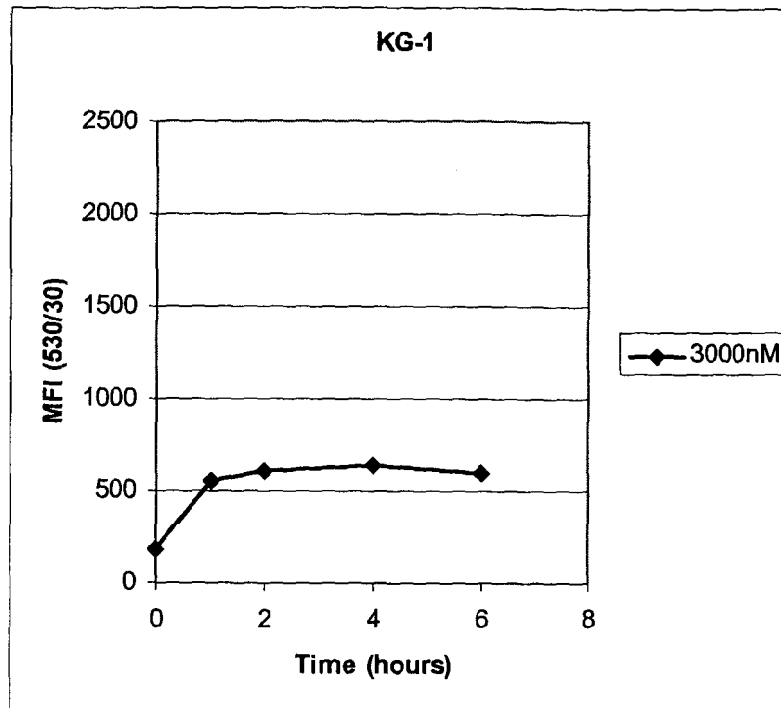

4/7

Figure 4 showing THP1 cells stained with Example 1, 30 minutes after dye wash off

5/7

Figure 5 showing fluorescence vs time for KG-1 cells treated with 3000 nM of Example 1

6/7

Figure 6 showing fluorescence vs time for THP-1 cells treated with 3000 nM of Example 1

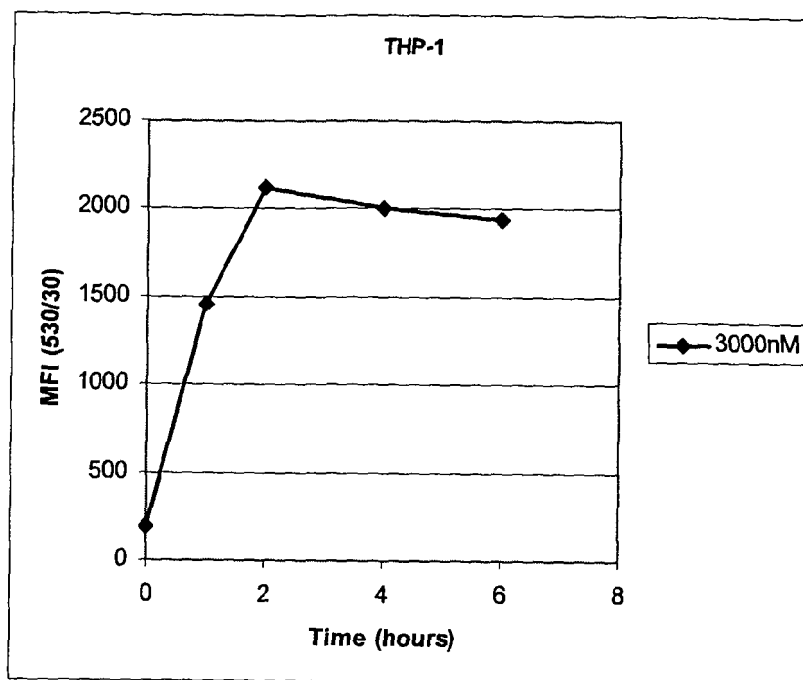

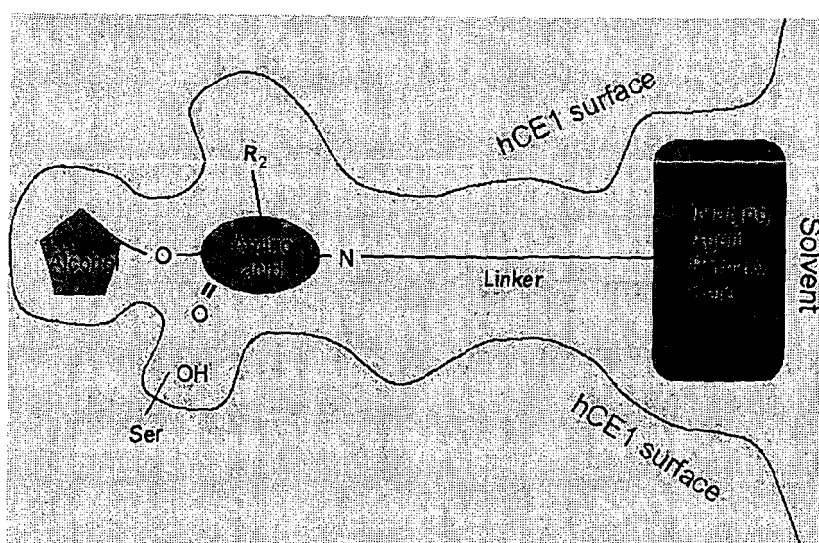

Figure 7: Generic design of imaging agents :

7/7

Figure 8 showing the predicted binding of Example 3 to hCE1 crystal structure 1MX1
