(54) Title: SECURE READER SYSTEM

(57) Abstract: A secure reader system (SRS, 100) for containers housing material to be employed in an application. A container (110) is provided having an information storing mechanism. A connector (118) of the SRS having a reader (200) is provided to physically couple to the container for periodically reading information there from. The connector is configured to physically couple to the container and may draw material from the container simultaneous with the reading.
