(54) Title: ABSORBENT ARTICLES FOR ODOR CONTROL WITH POSITIVE SCENT SIGNAL			
(57) Abstract			
The present invention comprises compositions and articles such as catamenials, diapers, pantliners, adult incontinence garments, and underarm shields which minimize odor caused by body fluids and which provide a pleasant scent signal to indicate that the odor is being removed. This scent signal, provided by cyclodextrin/perfume inclusion complexes and/or matrix perfume microcapsules, assures the wearer that the product is working.
