CLAIMS

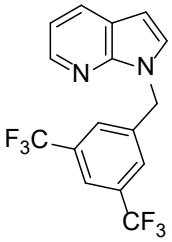

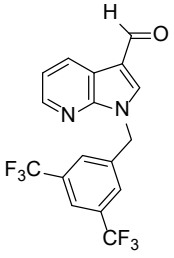

1. A method for the preparation of a compound having the following structure:

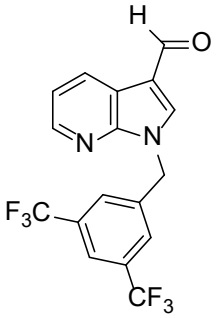

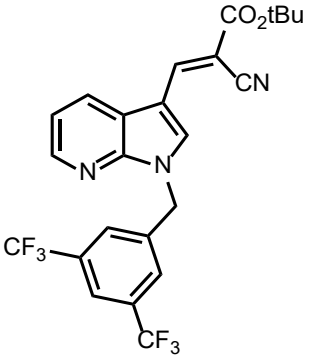

JXL069

, or a pharmaceutical acceptable salt thereof;

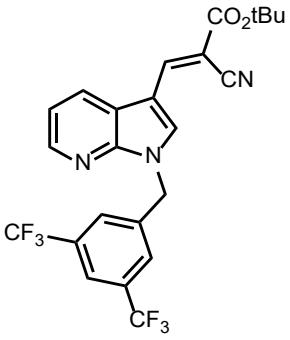

said method comprising:

reacting  with an acylation reagent to produce  ;

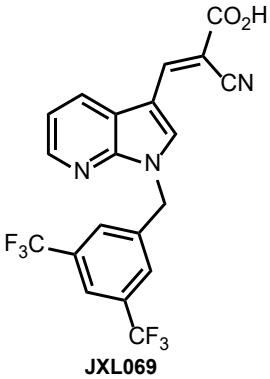

reacting  with  to produce 

4

; and

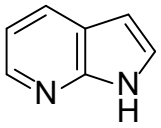

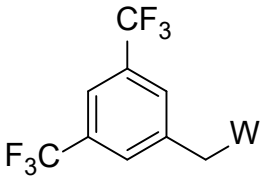

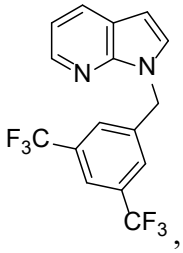

hydrolyzing 

4

to produce 

JXL069

.

2. The method of claim 1, further comprising reacting  with  to produce ,

wherein W is a leaving group.

3. The method of claim 2, wherein W is halo.

4. The method of any one of claims 2-3, wherein W is bromide.

5. The method of any one of claims 1-4, wherein the acylation reagent is phosphorus oxychloride.

6. The method of any one of claims 1-5, wherein hydrolyzing compound 4 produces JXL069 in more than 90% yield.

7. The method of any one of claims 1-5, wherein hydrolyzing compound 4 produces JXL069 in more than 95% yield.
