

ABSTRACT

An ethylene-vinyl alcohol copolymer composition contains: (A) an ethylene-vinyl alcohol copolymer including
5 two or more types of ethylene-vinyl alcohol copolymers having
different ethylene structural unit contents; and (B) an iron
compound; wherein the iron compound (B) is present in an amount
of 0.01 to 5 ppm on a metal basis based on the weight of the
ethylene-vinyl alcohol copolymer composition. The
10 ethylene-vinyl alcohol copolymer composition is substantially
free from coloration and excellent in heat stability.
