CLAIMS

1. A composition comprising:
   (a) 10-20 wt% acidifying bacteria,
   (b) 30-40 wt% of an oxidising agent,
   (c) 5-15 wt% of an organic acid, and
   (d) 1-10 wt% of a chelating agent.

2. A composition as claimed in claim 1, wherein the acidifying bacteria comprises *lactobacillus* bacteria.

3. A composition as claimed in claim 1 or claim 2, wherein the acidifying bacteria comprises *Lactobacillus plantarum*.

4. A composition as claimed in any one of the preceding claims comprising acidifying bacteria in an amount of 13-17 wt%.

5. A composition as claimed in any one of the preceding claims, wherein the acidifying bacteria is lyophilised.

6. A composition as claimed in any one of the preceding claims comprising an oxidising agent in an amount of 33-37 wt%.

7. A composition as claimed in any one of the preceding claims, wherein the oxidising agent comprises sodium carbonate and/or sodium percarbonate.

8. A composition as claimed in claim 7 comprising ~~10-20~~ 13-17 wt% sodium carbonate and ~~15-25~~ 18-22 wt% sodium percarbonate.

9. A composition as claimed in any one of the preceding claims comprising the organic acid in an amount of 8-12 wt%.

10. A composition as claimed in any one of the preceding claims, wherein the organic acid comprises citric acid.

11. A composition as claimed in any one of the preceding claims comprising the chelating agent in an amount of 3-7 wt%.

12. A composition as claimed in any one of the preceding claims, wherein the chelating agent comprises L-Glutamic acid N,N-diacetic acid.

13. A composition as claimed in any one of the preceding claims, wherein the composition is a powder.

14. A method of removing uric acid from a waste pipe comprising the step of inserting the composition as claimed in any one of the preceding claims into the waste pipe.

15. A method as claimed in claimed 14, wherein the waste pipe is a urinal waste pipe.
