(54) Title: RECONFIGURABLE WALLING SYSTEM

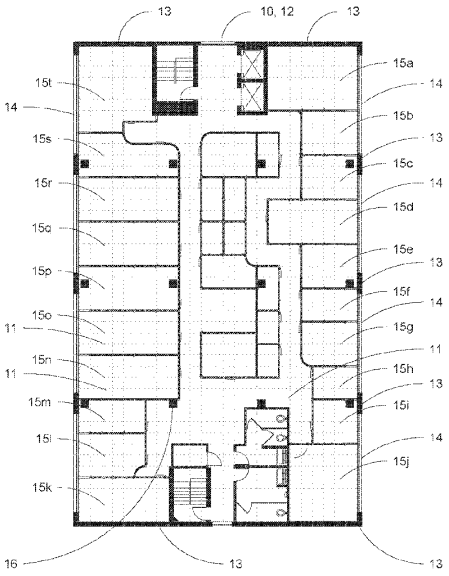

FIG. 1

(57) Abstract: A system for reconfigurably arranging a workspace in an existing architectural space has a plurality of ceiling connectors directly connectable to a ceiling of the existing architectural space with vertically adjustable support posts connectable to the ceiling connectors. A plurality of panel assemblies are interchangeably, releasably securable to the vertically adjustable support posts. The panels can be detached from the support posts, which can be moved so that panel assemblies can be attached to create a new workspace configuration.
