

FILM USED FOR OUTER BAG FOR CHEMICAL BODY WARMER

ABSTRACT

This film for an outer bag is a film that is used in an outer bag for containing a chemical body warmer. The film contains at least a deposition film layer obtained by depositing a metal and/or a metal compound, and the film has an oxygen permeability, at 50 °C, of 11.4 to 62.8 cc/m²·day·atm. The film forms the outer bag of a chemical body warmer.
