ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.(54) Title: APPARATUS FOR COOLING A BOX WITH HEAT GENERATING ELEMENTS RECEIVED THEREIN AND A
METHOD FOR COOLING SAME

(57) Abstract: A method for cooling a box with heat generating element received therein, comprising the steps of: (1) arranging in the box an air intake port for taking in air from outside and a discharge port for discharging air from the box to the outside, and installing a heat dissipating fin in the box, (2) disposing a part or a whole of the heat dissipating fin close to the air intake port within the box, and (3) causing the air taken in from the air intake port to pass through the heat dissipating fin to dissipate heat generated by the heat generating element, and then discharging air with a temperature raised by passing through the heat dissipating fin from the discharge port to outside of the box, thus cooling the box.
