(54) Title: LIGHT RAILWAY SYSTEM

Fig.1.

(57) Abstract: A light railway system comprising two parallel rails (12) each having a base portion (14) with a flat bottom, an upward-extending web (15), and a railhead (16), and resting within a respective trough structure (20). The trough structure (20) comprising multiple trough units (22) arranged end to end, with blocks (24, 26) that fit between the web (15) of the rail (12) and side portions of the trough unit (22) so as to locate the rail (12) within the trough structure (20). The system also includes multiple spaced-apart rigid ties (28) that interconnect the trough structures (20), so the rails (12) are at a desired separation. Inserted junction plates (54) may be used to hold successive trough units (22) in alignment.
