

**COMBINATION PREPARATION CONTAINING HETEROCYCLIDENE ACETAMIDE
DERIVATIVE**

[ABSTRACT]

5 The present disclosure provides a suspension-type
ophthalmic solution having excellent re-dispersibility. More
specifically, the present disclosure provides a water-based
suspension preparation containing a first component and a
second component, in which the first component is (E)-2-(7-
10 trifluoromethylchroman-4-ylidene)-N-(7-hydroxy-5,6,7,8-
tetrahydronaphthalen-1-yl)acetamide or a pharmaceutically
acceptable salt or solvate thereof, and the second component
comprises at least one component selected from the group
consisting of diquafosol, ciclosporin, hyaluronic acid,
15 loteprednol etabonate, bromfenac, fluorometholone and
pharmaceutically acceptable salts or solvates thereof.
