(54) Title: SHOE WITH WATERPROOF AND VAPOR-PERMEABLE UPPER AND SOLE

(57) Abstract: A shoe (10) with waterproof and vapor-permeable upper and sole, comprising - an upper assembly (11) which at least comprises, in a stratified manner, a vapor-permeable or perforated outer upper (12), a vapor-permeable inner lining (13), and, between them, a functional element, - an insole (15) having at least one waterproof vapor permeation region (A), - a bottom with a breathable sole (16). The functional element of the upper (14) is firmly joined to the upper (12) which ends toward the insole (15) with a sealing band (17) covered by an edge (18) being associated with a perimetric rim (19) of the insole (15), furthermore - the insole (15) selectively comprises or is joined to at least one lower functional element (20) having at least one band (22) which is free from the protective element (21), - a mutual waterproof seal is provided between the functional element of the upper (14), at the sealing band (17), and the at least one lower functional element (20) at the band (22).
