

ABSTRACT

CYCLIC AMINE COMPOUND AND ACARICIDE

The present invention provides a cyclic amine compound represented by formula (I) (in formula (I), Cy^1 and Cy^2 independently represent a C6-10 aryl group or a heterocyclyl group; R^{1a} to R^{5a} independently represent a hydrogen atom or an unsubstituted or substituted C1-6 alkyl group; R^{10} , R^{11} , R^{20} and R^{21} independently represent an unsubstituted or substituted C1-6 alkyl group, an unsubstituted or substituted C1-6 alkoxy group, a halogen atom or the like; m, n, p, and r each represent an integer of 0 to 5; and Y represents an oxygen atom or the like) or salt thereof, and an acaricide including the same.
