(54) Title: HOT WORK TOOL STEEL

(57) Abstract: The present invention relates to a matrix type hot work tool steel, in use having an improved abrasive wear resistance in demanding applications. It is particularly suited for applications in hot forging, die casting or hot extrusion. It is also suitable for press hardening, in particular for press hardening of Advanced High Strength Steel (AHSS) and has a high hot wear resistance. The hot work tool steel according to the invention has a composition as defined by the independent claim.
