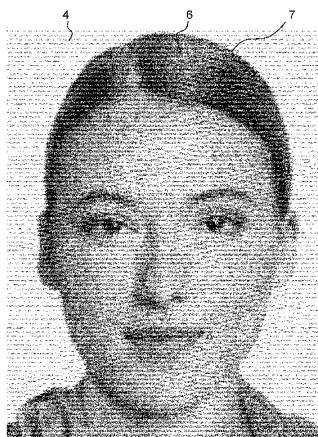

FIG. 11a

(57) Abstract: A data carrier (1) for a secure article such as a passport comprises a carrier body (2) and at least one security element (3) being provided on the carrier body (2). The security element (3) comprises at least one image (4) being printed on at least one surface structure (5) extending along an extension direction (E). The image (4) comprises at least one primary image (6) and at least one secondary image (7) being encoded in the primary image (6). The surface structure (5) is configured to decode the secondary image (7) when the data carrier (1) is viewed under different viewing angles and/or illuminated under different illumination angles, whereby the secondary image (7) becomes observable.
