(54) Title: IMPROVED CELL LINES HAVING REDUCED EXPRESSION OF NOCR AND USE THEREOF

Figure 6

(C)

(57) Abstract: The invention concerns the field of cell culture technology. It concerns production host cell lines with increased expression of ribosomal RNA (rRNA) achieved through reducing expression of NoCR proteins, especially of TIP-5. Those cell lines have improved secretion and growth characteristics in comparison to control cell lines. The invention further concerns a method of producing proteins using the cells generated by the described method.
