(54) Title: TELEVISION SCHEDULE SYSTEM WITH POP-UP ACTION MENU AND ICONS /

(57) Abstract

The present invention includes an interactive computer system (10) which provides television schedule information and displays an action pop-up listing actions which can be scheduled. In the preferred embodiment, a memory (14) stores a computer program, image data, and received data. This data includes the television schedule information. A processor (16) uses the computer program to organize the television schedule information into a desired format, display an action pop-up for a chosen program, and schedule an action listed in the pop-up when selected by the user. Icons are listed in various displays indicating actions scheduled for associated programs.
