

METHOD FOR PRODUCING
N-METHACRYLOYL-4-CYANO-3-TRIFLUOROMETHYLANILINE

ABSTRACT

A method for producing
N-methacryloyl-4-cyano-3-trifluoromethylaniline, wherein
4-cyano-3-trifluoromethylaniline is crystallized from a mixed
solvent of methanol and water, and the obtained
4-cyano-3-trifluoromethylaniline is reacted with methacryloyl
chloride improved separation property even in industrial
production in a large scale.
