(54) Title: TAMPERPROOF CASE

Fig. 1

(57) Abstract: A tamperproof case for a genuine article which comprises a space for accommodating the article between first and second sheet members which are capable of being permanently bonded together in at least the area that substantially completely surrounds the space. At least one of the first and second sheet members comprises at least one security element that is invisible under light in the visible wavelength range. This abstract is neither intended to define the invention disclosed in this specification nor intended to limit the scope of the invention in any way.
