

ABSTRACT

METHOD FOR CONFIGURED GRANT CONFIGURATION, TERMINAL, AND NETWORK-SIDE DEVICE

This disclosure provides a method for configured grant configuration, a terminal, and a network-side device. The method includes: obtaining a mapping relationship between a plurality of configured grant configuration sets and a plurality of indexes; receiving downlink control information DCI and determining, based on the mapping relationship, a configured grant configuration set corresponding to a target index that is indicated by the DCI; and activating or deactivating a configured grant configuration included in the configured grant configuration set that is determined.
