(54) Title: ANTI-WRINKLE SKINCARE COMPOSITION COMPRISING A STABLE HOMOGENEOUS AQUEOUS
SUSPENSION OF BIOPOLYMERS

(57) Abstract: Described herein are skincare compositions with beneficial skin properties, including smoothing the appearance fine
lines and/or wrinkles. The compositions are formulated for a dermatologically safe application to human skin and includes (i) biopolymer
molecules that have been mechanically processed into a stable homogeneous aqueous suspension and (ii) at least one of a humectant,
an emollient, an occlusive, a ceramide, an emulsifier, a thickening agent, a preservative, an antioxidant, a fragrance, a functional
ingredient, a UVB filter, a UVA filter, and a broad-spectrum filter. The stable homogeneous aqueous suspension comprises insoluble
and/or semi-soluble biopolymer particles stably dispersed within a polar solvent. Contrary to existing compositions, the stably dispersed
biopolymer molecules of the invention have not been obtained by solubilisation into an acidic solution or by solubilisation into a basic
solution.
