(54) Title: BIPHENYL-SUBSTITUTED TRIAZINES AS LIGHT STABILIZER

(57) Abstract

A description is given of biphenyl-substituted triazine compounds of formula (1). The biphenyl-substituted triazine compounds, which are notable for high thermal stability, are used as stabilizers for organic polymers to counter damage thereto caused by light, oxygen and heat, as light stabilizers for textile fibre materials, and as sunscreens for the human skin.
