

METHOD, APPARATUS AND SYSTEM FOR CHECKING CHANGE OF PHONE NUMBER

ABSTRACT

5 The present invention discloses a method, an apparatus and a system for checking a change
of a phone number. The method includes: detecting whether phone numbers of one or more users in
a first address book are changed; when detecting that a phone number of a first user in the first
address book is changed, obtaining the total number of detected changes of the phone number of
the first user through accumulation; and if the total number exceeds a check threshold, determining
10 that the phone number of the first user has been changed. The present invention solves a technical
problem of inaccuracy of a phone number recorded in an address book of a user caused by frequent
changes to the phone number in the address book.
