Pharmaceutical Composition for External Use

Abstract

[Problem to be Solved]

An object of the present invention is to provide a formulation technique that can suppress cloudiness and the formation of precipitate to provide excellent appearance characteristics, while incorporating diclofenac and a tocopherol and/or a derivative thereof into a pharmaceutical composition for external use containing water.

[Solution]

When menthol is blended into a pharmaceutical composition for external use containing diclofenac and/or a salt thereof, a tocopherol and/or a derivative thereof, and water, cloudiness and the formation of precipitate due to diclofenac and/or a salt thereof and a tocopherol and/or a derivative thereof can be suppressed, and excellent appearance characteristics can be provided in the pharmaceutical composition for external use.
