Claims

1. A calcium enriched seafood product comprising an additional calcium supplement wherein the seafood product is selected from seafood flake, shredded, chunk or steak, which contains calcium in the final product in the range of 1 to 2 % (w/w) of the total weight of said product and the median diameter of the particle size distribution of calcium is between 0.1 and 30 microns.
2. The calcium enriched seafood product according to claim 1, wherein said calcium enriched seafood product can be a shelf stable, a chilled fish product or a frozen fish product.
3. The calcium enriched seafood product according to claim 1, wherein the sources of additional calcium supplement can be selected from raw or partially purified animal or fish bone or inorganic calcium compound.
4. The calcium enriched seafood product according to claim 3, wherein the fish bone is derived from marine or freshwater fishes.
5. The calcium enriched seafood product according to claim 4, wherein the fish bone is derived from salmon or tuna.
6. The calcium enriched seafood product according to claim 4 or claim 5, wherein the fish bone is derived from tuna.
7. The calcium enriched seafood product according to claim 3, wherein the inorganic calcium compound can be selected from the group of calcium carbonate, calcium phosphate, calcium sulfate and calcium chloride or combination thereof.
8. The calcium enriched seafood product according to any one of claims 1 to 7, wherein said product has improved qualities comprising taste, texture and water holding capacity.
9. The calcium enriched seafood product according to claim 8, wherein said product contains the amount of available calcium in the range of 150 to 400 mg/100g of the product.
10. The calcium enriched seafood product according to any preceding claim, wherein said product further comprises filling media selected from the group of brine, vegetable oil, spring water or savory gravy.
11. The calcium enriched seafood product according to claim 1, wherein said product is tuna or salmon flake in oil, tuna or salmon flake in brine, tuna or salmon spread.

12. The calcium enriched seafood product according to claim 1, wherein said product is prepared from tuna selected from the tuna species including Skip Jack, Yellow fin, Albacore or Big eye.
13. The calcium enriched seafood product according to any preceding claim, wherein said product is packed product included in a container selected from the group of can, pouch or plastic cup.
14. The calcium enriched seafood product according to claim 1, wherein the median diameter of the particle size distribution of calcium is at 10 microns.
