

【ABSTRACT】

The present invention relates to a mask pack. The mask pack of the present invention is convenient to use since the contents of the mask pack are not put on the hand during handling, and the mask pack is hygienic and has excellent adhesion to skin and feeling of use. In addition, the mask pack is immersed in a high-viscosity dosage form, such as cream, and thus can be utilized as a high-moisturizing and high-nourishing pack.
