

VEHICLE SAFETY SYSTEM, DISTANCE DETERMINATION METHOD, AND VEHICLE

ABSTRACT OF THE DISCLOSURE

A distance determination method has: detecting a first received signal strength indicator (RSSI) of a first electronic device by a second electronic device; detecting a second RSSI of the second electronic device by the first electronic device; obtaining the first RSSI from the second electronic device by the first electronic device; and calculating a motion direction and a distance of the second electronic device relative to the first electronic device according to the first RSSI and the second RSSI by the first electronic device.
