

INTERMEDIATES USEFUL FOR PREPARING DISPERSANT-VISCOSITY
IMPROVERS FOR LUBRICATING OILS

ABSTRACT OF THE DISCLOSURE

5 Compositions comprising reaction product of higher molecular weight
olefinic reactants with carboxylic reactants of the formula $R^3C(O)(R^4)_nC(O)OR^5$
(IV) or the corresponding acetals, hemiacetals, ketals, and hemiketals thereof are
useful as intermediates for further reaction in the preparation of lubricating oil
additives.
